

JUAN PABLO ESPINEL GALVIS

MERCHANT OPERATIONS & TECHNICAL OPERATIONS SPECIALIST

Chía, Colombia | Open to Remote Worldwide | Open to Business Travel & International Relocation
(+57) 315 677 1482 | espinelgalvisjuanpablo@gmail.com | LinkedIn | Portfolio | GitHub | English — Native | Spanish — Native

PROFESSIONAL SUMMARY

Fintech Merchant and Technical Operations professional with experience investigating merchant account and payout issues, supporting account setup and onboarding-related workflows, explaining payment workflows and coordinating high-touch stakeholder operations. Experienced with Stripe Dashboard, payout lifecycles, pricing, API concepts, test environments, technical documentation, case investigation and quality review. Also brings hands-on field operations experience coordinating personnel, vendors, logistics and onsite client execution. Technical fluency in Power BI, Google Sheets, Apps Script, SQL and APIs complements an operations-first profile.

CORE COMPETENCIES

Merchant & Payments Operations: Merchant Operations | Merchant Onboarding | Account Configuration | Payout Operations | Payment Workflows | Technical Case Management | SLA Awareness

Technical Operations & QA: Root-Cause Analysis | Troubleshooting | Edge-Case Identification | Process Improvement | Quality Assurance | SOP/Documentation | Technical Communication

Stakeholder & Field Operations: Enterprise Stakeholder Management | Vendor Coordination | Onsite Execution | Cross-Functional Coordination | Workforce Coordination

Tools: Stripe Dashboard | Lumos | SINCO ERP | Power BI | Excel | Google Sheets | Google Apps Script | SQL | REST APIs | Vercel | Supabase

PROFESSIONAL EXPERIENCE

STRIPE | Customer Service — Fintech & Technical Operations | Aug 2024 – Mar 2026

- Managed end-to-end fintech cases across chat, email and phone, investigating merchant account configurations, payout schedules, payment-platform behavior and account requirements using Stripe Dashboard and internal tools.
- Guided merchants through Dashboard navigation, pricing, payout workflows, account configuration, API integration concepts and test-environment use, translating technical information into actionable operational guidance.
- Investigated missing or delayed payouts and account discrepancies, using internal visibility to identify causes and coordinating with relevant parties when external bank investigation was required.
- Contributed to the Boosters process-improvement initiative, helping increase operational productivity by 35% through queue monitoring, agent reallocation, training support, and Workforce coordination.
- Supported weekly quality-assurance activities through 40+ case reviews, identifying accuracy, process and communication gaps and providing structured feedback.

VISA | Fraud & Financial Dispute Specialist | Mar 2026 – Jun 2026

- Managed transaction and dispute cases in a high-volume payments environment, reviewing evidence, transaction attributes and operational procedures and communicating directly with merchants and acquirers.
- Coordinated case resolution across write-off, pre-arbitration and arbitration paths, applying applicable rules and escalating cases when required.
- Built a structured Google Sheets decision-reference framework to consolidate operational guidelines and improve accessibility during complex case handling.

ONTARGET COLOMBIA | Systems Specialist & Operations Coordinator | May 2022 – Aug 2024

- Served as a primary operational liaison between OnTarget and corporate real-estate clients, coordinating more than five projects and repeated engagements with three core accounts.
- Owned day-to-day execution details for client activities, coordinating promoters, catering, DJs, schedules, vendor communication, expense documentation and onsite stakeholder needs.
- Presented and coordinated onsite activities directly with client representatives, resolving operational issues and ensuring personnel, suppliers and logistics were aligned before and during execution.
- Maintained operational reporting using Excel, SINCO ERP and later Power BI, supporting management visibility into activity and performance.

SELECTED TECHNICAL PROJECTS

Designed and deployed lightweight web platforms including Prisma, Andariegos, JPEG Store and Hack Academy on Vercel, demonstrating practical knowledge of responsive interfaces, state management, API concepts, multilingual routing and digital workflows. These projects complement, rather than replace, professional fintech operations experience.
