

JUAN PABLO ESPINEL GALVIS

FINTECH RISK, FINCRIME & COMPLIANCE OPERATIONS SPECIALIST

Chía, Colombia | Open to Remote Worldwide | Open to Business Travel & International Relocation
(+57) 315 677 1482 | espinelgalvisjuanpablo@gmail.com | LinkedIn | Portfolio | GitHub | English — Native | Spanish — Native

PROFESSIONAL SUMMARY

Fintech Risk and Financial Crime Operations professional with experience investigating payment transactions, fraud indicators, disputes and chargebacks, making write-off and escalation decisions, and managing pre-arbitration/arbitration workflows in a global payments environment. Experienced in evidence review, transaction-attribute analysis, merchant/acquirer communication and operational decision frameworks under structured rules. Additional practical KYC/AML knowledge from training and case exercises, including Edison and Prado. Technical fluency in SQL, Power BI, Google Sheets, Apps Script and APIs strengthens risk and operations work without positioning the profile as software engineering.

CORE COMPETENCIES

Risk & FinCrime: Transaction Investigation | Fraud Assessment | Transaction Monitoring | Dispute & Chargeback Operations | Write-Off Assessment | Pre-Arbitration | Arbitration Prevention | Evidence Review | Risk Assessment | Compliance Operations | KYC/AML Workflows
Payments & Platforms: Stripe Dashboard | Visa Regulatory Framework (VROL) | Payout Lifecycle | Merchant/Acquirer Operations | Transaction Identifiers (TxIDs) | ARN Tracing
Data & Technical: SQL | Power BI | Google Sheets | Google Apps Script | REST APIs | Vercel | Supabase

ADDITIONAL KNOWLEDGE

KYC/AML verification workflows | Identity and business-data validation | Edison | Prado | Global compliance manuals and practical case exercises. These represent additional training/working knowledge, not employment at Revolut.

PROFESSIONAL EXPERIENCE

VISA | Fraud & Financial Dispute Specialist | Mar 2026 – Jun 2026

- Investigated payment transactions and dispute cases by reviewing transaction-entry classifications, processing attributes, transaction identifiers, evidence, and applicable operational procedures.
- Made case-level decisions on write-off eligibility and escalation paths, including pre-arbitration and arbitration workflows, while applying Visa Regulatory Framework (VROL) requirements.
- Communicated directly with merchants and acquirers to exchange case information, clarify evidence, and support resolution before formal escalation when possible.
- Consolidated complex operational guidelines into a structured Google Sheets decision-reference framework, improving accessibility and consistency during case investigations.

STRIPE | Customer Service — Fintech & Technical Operations | Aug 2024 – Mar 2026

- Investigated merchant account, payout, and payment-platform issues using Stripe Dashboard and internal operational information, including payout schedules, account configuration, and KYC-related requirements.
- Supported merchants across chat, email and phone while translating technical platform behavior into clear operational guidance, including Dashboard navigation, pricing, payout lifecycle, API integration concepts, and test-environment workflows.
- Contributed to the Boosters process-improvement initiative, helping increase operational productivity by 35% through real-time queue monitoring, agent reallocation, training support, and Workforce coordination.
- Supported weekly quality-assurance reviews, conducting 40+ case reviews to identify accuracy, process, and communication gaps and provide structured feedback.

ONTARGET COLOMBIA | Systems Specialist & Operations Coordinator | May 2022 – Aug 2024

- Served as a primary stakeholder liaison for corporate real-estate accounts, coordinating people, vendors, logistics, and onsite execution across more than five projects.
- Coordinated promoters, catering, DJs, schedules, client requirements, expense documentation, and vendor follow-ups, serving as the operational point of contact before and during client activities.
- Maintained operational reporting and business data using Excel, SINCO ERP and later Power BI, supporting management visibility into activity and performance.

SELECTED TECHNICAL PROJECTS

Built and deployed Prisma and Andariegos web utilities on Vercel, demonstrating practical knowledge of transactional data flows, state management, responsive interfaces, APIs and mobile accessibility. Technical projects are complementary to professional fintech risk and operations experience.
